

DIVISIONING / SKILLS SCORECARD

Bocce — Athlete / Unified Partner

How to score

- The pallina is placed on the center of each line (30 ft / 40 ft / 50 ft). The player rolls all 4 balls toward it; the official measures each ball in centimeters and records the distance below.
- Check whether this scorecard is for the Athlete or the Unified Partner. If both are being scored, the Unified partner completes their divisioning/skills rolls first, then the athlete completes theirs.
- If the pallina is moved from its spot during a round, reset it to its original position before the next ball is rolled.

Player Name: _____ Date: _____

Participant Type: ☐ Athlete ☐ Unified Partner

All measurements are recorded in centimeters (cm). Measurements will be taken from the center side of the bocce ball to the center side of the pallina, for a total of 12 measurements, the sum of which becomes the athlete's divisioning score. For Doubles and Teams, the sum of the athletes divisioning scores shall be the Doubles and Team's divisioning score (4.1.7, 4.1.8).

Pallina Distance	1st Ball	2nd Ball	3rd Ball	4th Ball	Totals For Each Pallina Distance
30 Feet					
40 Feet					
50 Feet
