Create an account

You will need a unique **username** for each participant, however, you can use the same email address for all. The username must look like an email address but you may add things to that username that will make it unique for each athlete. Example: john@gmail.com.dave for the first athlete and john@gmail.com.steve for the second. When an email already associated with an existing user is entered, it will prompt the user to create a unique username where they can then enter something like the above.

Best practice would be to securely keep a list of your user names if you are registering or updating more than one athlete.
